Champion High School

***FIRST* Robotics Team 2010, The Lightning Bots**

www.chs-robotics.org

Dear Local Business Owner,

We, ***FIRST* Team 2010, The Lightning Bots,** are proud to announce our 21st season in the *FIRST* Robotics program. Champion High School's robotics team works year after year to inspire young people through a nine month long STEM (science, technology, engineering, and math) program. *FIRST* Robotics provides high school students with the opportunity to design, build, and program a robot for competition, as well as public relations experiences. This program has had a significant impact on culture, and *FIRST* Robotics has grown to over 9,000 teams worldwide.

The goal of this program is to not only get students interested in STEM, but to help them prepare for their futures beyond high school. Our goal is to foster a culture of critical thinking, engineering, dedication, and ingenuity so that our students not only are successful at the competition, but in the ever-growing STEM field.

Corporate and community sponsors are the backbone of all *FIRST* teams. Without assistance from financial supporters, this program would not be able to sustain itself. Community support through donations, fundraisers, and grants provides local students with numerous opportunities. The *FIRST* program gives students access to scholarships, internships, and the technical knowledge needed to become the STEM leaders of tomorrow. We aim to provide this experience to all students, no matter what financial background they come from.

How can you and/or your business become involved? There are many ways that you can become involved, and all of these opportunities are rewarding to your business and the students. Enclosed with this letter a list of ways you can support the CHS *FIRST* Robotics Team 2010, the Lightning Bots. Please contact Barb Hummel at 330.507.6726 or Lbots2010@gmail.com with any questions or to discuss donations. We thank you for your time and consideration!

Thank you,

Barb Hummel
Booster President
